## Slide 3: Problem Statement

## ❌ المشاكل

### The Scouting Crisis

**Current Reality:**

```
┌──────────────────────────────────────────────────────┐
│  Problem 1: Inefficient Scouting                      │
│  ──────────────────────────────────────────────────  │
│  • 90% of talent goes undiscovered                    │
│  • Scouts rely on gut feeling, not data               │
│  • Manual video analysis = 20+ hours per player       │
│  • Geographic bias: Cities vs Rural                   │
└──────────────────────────────────────────────────────┘

┌──────────────────────────────────────────────────────┐
│  Problem 2: No Standardized Player ID                 │
│  ──────────────────────────────────────────────────  │
│  • No unified player tracking system                  │
│  • Players rebuild profiles at every academy          │
│  • No cross-platform verification                     │
│  • Lost career data and achievements                  │
└──────────────────────────────────────────────────────┘

┌──────────────────────────────────────────────────────┐
│  Problem 3: Academy-Discovery Gap                     │
│  ──────────────────────────────────────────────────  │
│  • Academies can't reach all talent                   │
│  • Parents don't know opportunities                   │
│  • No transparent talent pipeline                     │
│  • Corruption and favoritism allegations              │
└──────────────────────────────────────────────────────┘
```

### The Cost

- **$2.3M** average loss per academy due to talent miss
- **67%** of promising players quit by age 15 (undiscovered)
- **$890M** wasted annually on ineffective scouting
